Diversity Roadmap - Science

Year 6

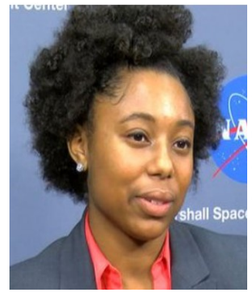

Stephen Hawking:
Stephen Hawking was a great modern English theoretical physicist, with a brilliant five-decade career in science and astronomy. Hawking suffered from ALS.

"However difficult life may seem, there is always something you can do and succeed at."

Year 5

Tiera Guinn: 21-year old American scientist Quinn is a rocket scientist who works for NASA. She is an aeropace major currently helping to build one of the most powerful and biggest rockets ever.

"You have to look forward to your dream and you can't let anybody get in the way of it...you have to understand that nothing comes easy. Keeping your eyes on the prize, you can succeed."

Year 4

George Washington Carver: an agricultural chemist who gained acclaim for his discovery of alternative farming methods, best known for his discovery of uses for the peanut.

Year 3

James Wong:
A British award-winning ethnobotanist, television presenter and garden designer born to a Bornean father and a Welsh mother.

Year 2

Lauren Esposito:
The world's only female Arachnologist. She talks about the loneliness of being queer in the world of science, so launched '500 Queer Scientists', which aims to highlight the diversity within science and ensure that the LGBTQ+ generation has role models and create more opportunities for them.

Sir David Attenborough: an English biologist best known for his nature documentaries and conservation work.
"*The natural world...is the most precious thing we have and we need to defend it.*"

Year 1

Nursery
Steve Irwin: an Australian zookeeper, conservationist and environmentalist who was best known for working with reptiles.

Reception
Katherine Johnson: an African-American scientist and mathematician whose science helped NASA send rockets to space and to the Moon.
